

Sliding door frames

EASYSLIDE

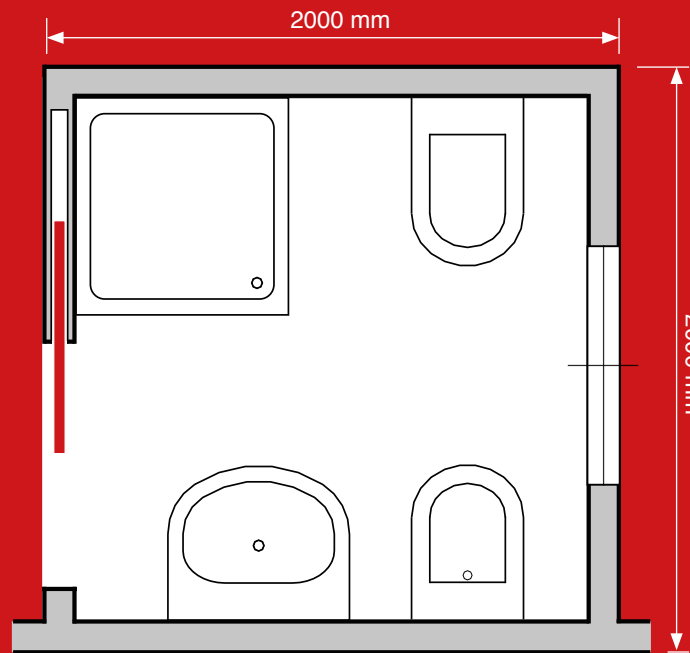

Welcome to a new dimension in home living! >>>

How to best use a 4 m² internal space?

Yes, we can >>>

EasySlide the revolution in home living!

EasySlide pocket doors kit for plasterboard walls.

This innovative system, specifically designed to save the space normally required by traditional doors will also give your home or office a new look.

- 1 **EasySlide** is easy to install requiring no specific technical competence thanks to its revolutionary click-in system.
- 2 **EasySlide** is compatible with any type of door.
- 3 No specific tools are required for installation. If you can handle simple DIY then you can easily install an **EasySlide** kit.
- 4 The innovative design allows for fast and accurate installation saving you time and money.

Just a few
steps to give
your home
a new
dimension.

A winner for buying in

A winner for selling out

- 1 EasySlide is packed in a practical eco-friendly box.
- 2 The dimensions of the box are extremely small - about five times smaller than pre-assembled versions. This makes handling easy.
- 3 The kit can be stored using very little space (in one square metre you can store up to 50 packs)

- 1 EasySlide weighs only 12kg and can be easily transported by car.
- 2 EasySlide is covered by a **10 year warranty** against defects and malfunction.
- 3 Due to the nature of its design EasySlide is more versatile than pre-assembled versions.
- 4 It is easy to install and therefore suitable for a wide range of customers.
- 5 We provide the customer with all necessary sales support: a table top sample, assembly instructions included in every package, QR code activated tutorial video and technical assistance on the website.
- 6 EasySlide fits all available standard door sizes.
